## THEME

Policies, technologies and applications are the three key factors affecting growth of geospatial industry. Formulation of policies and its associated implementation requires strong engagement and propagation of innovations and practices. Public private partnership is one instrumental driver not only in bridging technological gaps, but in integrating stakeholders for maximum impact. The theme CONVERGENCE: Policies + Practices + People via PPP aims to address the need for greater coordination among policy-makers, technology providers and users to benefit the industry, and to highlight geospatial workflows as an enabler for successful PPPs by facilitating more informed decision making among the stakeholders.

## WHY TOGETHER?

Considering the underlying objectives of both INSPIRE and Geospatial World Forum is to promote the optimal use and implementation of spatial data and resources for growth, there is an existing foundation for a synergised effort. While INSPIRE is designed to discuss the latest developments of the INSPIRE Directive, addressing common policy issues, applications and implementations of SDIs, Geospatial World Forum features success stories of private industry and users of spatial data boosting the business of spatial information and downstream dissemination of the technology applications. By combining efforts, both INSPIRE and Geospatial World Forum can create a strong case for Public-Private Partnership initiative and to strengthen dialogue and discussions for promotion of geospatial technologies with all stakeholders while enabling networking of professionals at global scale.

**Don't miss your chance to be a part of  
this exciting collaboration!**

*We shall announce the call for paper abstracts soon..*
