

ETL tools as a support for harmonization of spatial data according to INSPIRE

90% of the data in the world today has been created
in the last two years alone

Every day, we create 2.5 quintillion bytes of data

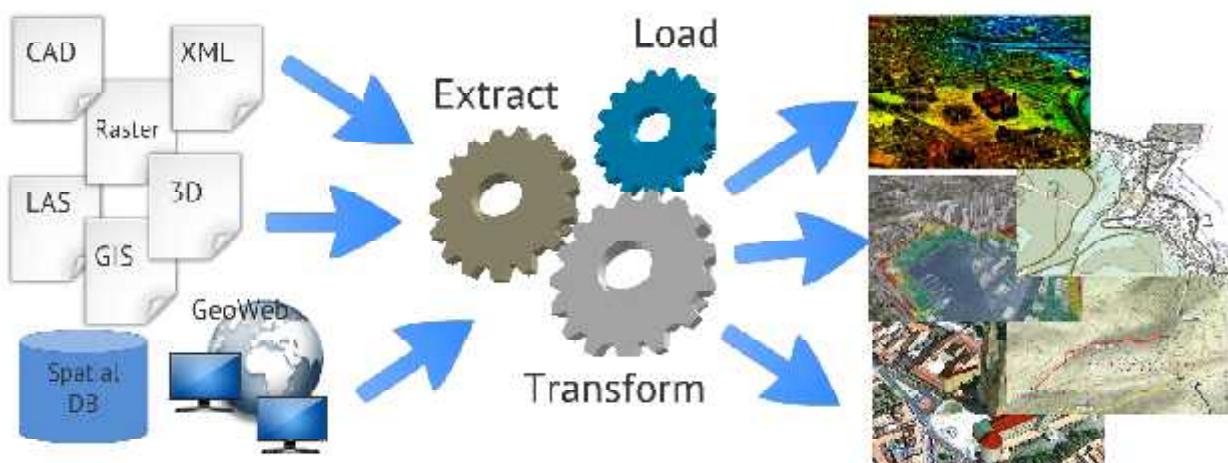

10^{18}

Exabyte

1 000 000 000 gigabytes
1 000 000 terabytes

Spatial ETL tools

FME, GeoKettle, Sextante, SDI Talend Open Studio

Live Demonstration

Data inspection
Transformation
Format conversion
Schema mapping
Cataloging
Quality control
Spatial analysis
XML creation
HTTP request
Command line execution

TK25 metadata

Default elements:

- Resource title
- Resource abstract
- Resource Type
- Resource language
- Topic category
- Keyword value
- Originating controlled vocabulary
- Lineage
- Spatial resolution
- Degree
- Specification
- Limitations on public access
- Conditions applying to access and use

Dynamic elements:

- Unique resource identifier
- westBoundLongitude
- eastBoundLongitude
- southBoundLatitude
- northBoundLatitude
- Date of publication
- Metadata date

Variable elements:

- Responsible party
- Responsible party role
- Metadata point of contact
